

A Message from Jessica Sullivan, Board Chair:

The Children's House board of directors ("Board") last met on Friday, November 17, 2017.

At the top of each meeting's agenda is our school's mission,

The Children's House prepares a Montessori learning environment that supports and respects the development of each unique child and nurtures them to become independent, curious, confident, lifelong learners who strive to contribute to their communities and the greater world.

We read this at the start of each of our board meetings. Michele then does a Montessori 10, where she provides Montessori education to the board. At the November meeting, we took 10 minutes to tour the school and watch your children in their classrooms. It was inspiring to see how the children interact with one another and how each classroom environment is carefully laid out. Great to see our mission in action.

At this meeting we received the final word that Hallmark Construction will break ground on the new Fine Arts and Music wing on Tuesday, November 21st. In case you missed it, below is a news link:
